

I am commenting on the FCC proposal to expand Low Power FM (LPFM) service over those radio stations like K-LOVE who uses a FM translator. If K-LOVE were forced off the air in my area, this would have a definite negative impact on my enjoying the type of radio programming K-LOVE has to offer. Many in my community share the enjoyment that K-LOVE has to offer and replacing them with a LPFM broadcaster could not server the same purpose. Therefore, I feel it would be in the best interest of the public that nothing is done to interrupt the service provide by K-LOVE in anyway. Thank you.
